---

---

**How to send sample:**

- After collection of your soil sample/samples keep about 300 g of sample in plastic bag/bags and seal it. Please ensure that soil samples collected from different location is thoroughly mixed so that each sample should represent a particular area.
- Label the sample bag/bags properly in such a way that it clearly represents sample identification number. Fill the soil testing form with maximum information as you can provide.
- Send the sample with duly filled form for analysis.

**Note:** For detailed information on sample collection procedure visit our website [www.plantneeds.com.au](http://www.plantneeds.com.au).
